But if the farmers would consent to pay higher prices to the manufacturers, the manufacturers would pay them higher prices. Would they? and if they did, what then? One thing would balance the other. But they would not. Everybody knows that, with a prosperous agriculture, we could and would export produce. Evit, would go far towards restoring things to a healthy position. Without a foreign market the farmer would be at the mercy of the manufacturer.

It is not that imports are now large, that interferes with domestic manufactures. Imports are small. It is that consumption of goods is reduced for the time being. Is this to be remedied by imposing fresh burdens on the
